PROFESSIONAL SUMMARY

Assertive software tester with expertise in manual testing and a growing proficiency in test automation. With over a year of experience in quality assurance, I excel at planning and executing comprehensive test strategies. Proficient in identifying and documenting software defects, I have a keen eye for detail and a thorough understanding of the testing life cycle. Leveraging my foundation in manual testing, I am actively expanding my skills in test automation to enhance efficiency and effectiveness. Committed to delivering high-quality software, I employ a combination of manual and automated testing techniques for optimal results.

EDUCATION

Computer Science,

WORK EXPERIENCE

Lectie   **December 2022 – Present**

Junior Software Tester Intern   *Victoria, Melbourne, Australia*

- Improved the build process, enhanced system quality, and reduced defects by 45%.
- Created standardized test plans, test scripts, and daily status reports, improving productivity by 9%.
- Developed and executed manual test cases.
- Oversaw project test objectives.
- Collaborated with the Development team to test software quality through manual and automated testing.
- Assessed software bugs and compiled findings along with suggested resolutions for development team members.
- Wrote and optimized test cases to maximize the success of manual software testing with consistent, thorough approaches.
- Operated under Agile and Scrum frameworks to complete releases and well-organized sprints.
- Evaluated function, performance, and design compliance of every product against design standards and customer needs.
- Used Jira to report, track, and monitor defects.
- Utilized JIRA to foster seamless team communication, leading to a remarkable enhancement in workflow efficiency.
- Executed comprehensive website testing across all staging, development, and production environments.
- Demonstrated exceptional initiative as a self-starter by leveraging Postman and Swagger for comprehensive API testing.
- Expertly conducted tests to detect, communicate, and rectify bugs and glitches.

Quales Consulting   **January 2022 – April 2022**

Quality Assurance Software Tester Intern   *Ogun, Nigeria*

- Created and executed automated software test plans, test cases, and test scripts to uncover, identify, and document software
- problems and causes.
- Used Cypress to create and execute automated test scripts.
- Conducted manual and automated testing using Postman and Postwoman for a Virtual Classroom and Teleconferencing System.

Nerdbuds LTD   **August 2022 – June 2023**

Frontend Developer   *Abuja, Nigeria*

- Built registration/login pages for a company website.
- Designed, developed, and tested the UI for mobile and web applications.
- Created reusable code and libraries for future use.
- Translated user and business needs into functional frontend code effectively.

- Coded using HTML, CSS, and JavaScript to develop features for both mobile and desktop platforms.

Alabian Solutions LTD   **January 2021 – June 2021**

Junior Web/Mobile App Developer   *Lagos, Nigeria*

- Built an e-commerce website using NodeJS and the EJS template engine.
- Developed a virtual classroom and a teleconferencing system using the EJS template engine and NodeJS.
- Collaborated with in-house web designers to create sleek and innovative UI designs.
- Created interfaces to manage backlog data using JavaScript.
- Developed a Miwok language translator app using Java and Android Studio, contributing to language preservation.
- Collaborated with multiple development teams during the analysis, design, and implementation of a dating application using
- React Native and React JS.
- Tested applications before final review to verify issue resolution.
- Successfully addressed issues with an existing mortgage application, resulting in a significant 20% drop in consumer grievances.
